Questions? We're here for you. Visit Nelnet.studentaid.gov, call us at 888-486-4722, or send correspondence to Nelnet, P.O. Box 82561, Lincoln, NE 68501-2561.

Sincerely,

Your Nelnet Customer Service Team

Current Amount Due

Your amount due is subject to change for reasons including but not limited to adding, removing, or changing an alternate payment amount, cancelling auto debit, the addition of a deferment or forbearance that covers the payment due date, or the addition of new loans to your Nelnet account. This also includes a loan/group pending a final payment in which interest accrual is an estimation and could be impacted by the actual effective date the final payment is made.

Current Balance

The current balance is made up of the combined sum of the loan's outstanding principal balance and accrued interest.

About Interest Rates

Congress sets interest rates for federal student loans, which vary depending on your loan type and disbursement date. Your loans accr daily interest, calculated with a simple daily interest formula. Changes in your outstanding principal balance or interest rate (if it's a variable rate) affect the amount of interest that accrues daily. To view current and past federal student loan interest rates and the simple daily interest formula, visit StudentAid.gov/understand-aid/types/loans/interest-rates.

Fixed Interest Rates vs. Variable Interest Rates

Fixed interest rates are constant for the life of the loan, but variable interest rates are adjusted annually on July 1st.

Regulatory Interest Rate

The starting rate for your student loan.

Effective Interest Rate

The rate you actually pay after any active borrower benefits are applied. For example, if your Regulatory (starting) Interest Rate is 5.50% and you are receiving an interest rate reduction of 0.25% for being enrolled in auto debit while in active repayment, your Effective Interest Rate will be 5.25%.

Fees

The U.S. Department of Education does not assess late or returned payment fees.
